$$14 + 12 = \dots$$

$$14 + 12 = \dots$$

$$14 + 12 = \dots$$

$$\overset{6}{\text{14}} + \text{12} = \dots$$

$$14 + 12 = 6$$

The image displays a mathematical equation: 14 + 12 = 6. The numbers 14 and 12 are rendered in red and blue, while the plus sign, equals sign, and the result 6 are in black and blue. A blue arc connects the 4 and 2, with a blue 6 above it.

$$14 + 12 = 6$$

14 + 12 = 6

$$14 + 12 = 26$$

2

$$14 + 12 = 26$$

$$23 + 11 = \dots$$

$$23 + 11 = 44$$

23 + 11 = 34

The equation is annotated with colored arcs and numbers. A blue arc connects the blue '3' in '23' and the blue '1' in '11', with a blue '4' above it. A red arc connects the red '2' in '23' and the red '1' in '11', with a red '3' below it.

$$23 + 11 = 34$$

$$15 + 32 = \dots$$

$$15 + 32 = 6$$

The image shows a mathematical equation: 15 + 32 = 6. The numbers 15 and 32 are written with the first digit in red and the second digit in blue. The plus sign and equals sign are black. The result 6 is blue. A blue arc connects the top of the 5 and the top of the 2, with a blue 7 above it, indicating a carry-over of 7 from the units place to the tens place.

15 + 32 = 47

The diagram shows the addition of 15 and 32. A blue arc connects the 5 and 2, with a blue 7 above it. A red arc connects the 1 and 3, with a red 4 below it.

$$15 + 32 = 47$$

$$20 + 18 = \dots$$

$$20 + 18 = 8$$

20 + 18 = 38

The diagram shows the addition of 20 and 18. A blue arc connects the 0 in 20 and the 8 in 18, with a blue '8' above it. A red arc connects the 2 in 20 and the 1 in 18, with a red '3' below it.

$$20 + 18 = 38$$
